# Pet Dander: The Constant Battle

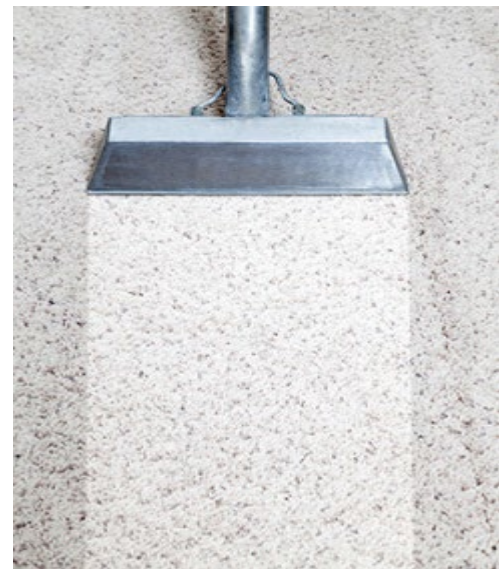

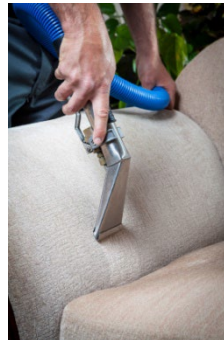

## Create A Clean Routine

The online medical advise health website, WebMD.com offers advise on pet allergies and how to battle them. In the article from <https://pets.webmd.com/features/pets-allergies> the medical professionals suggest “Other allergy sufferers tackle pet allergies by shampooing rugs regularly, changing people and pet bedding frequently, wiping down walls where pets rub, and dusting often” as well as paying attention to the upholstery in your home.

Holiday offers a direct-drive truck mount system that is better at removing stains and extracting debris deep in the fabric than anything that can be rented.

For our upholstery cleaning, a special attachment is used for fabric. The solution used, is for upholstery cleaning and is called "Liquid pro". This will break down the dust, dirt and oils from every day use in the fabric. After it is cleaned it will take approximately 6 to 12 hours to dry due to the thickness of the cushions.

Pet dander can settle in deep. Holiday's deep steam extraction method is more powerful than retail rentals.

Wine stains, coffee stains and pet accidents: What can be done to restore the cleanliness desired?

# The Nightmare Stain

Oh no...what can I do?

Wine stains, coffee stains, pet accidents and the ultimate accident, finger-nail polish.

To treat a wine stain, create a solution to treat the stain asap. Add a tablespoon of hand dishwashing soap and a tablespoon of white vinegar to two cups of warm water. Using white cloth, only - so pigment from the cloth doesn't bleed into your carpet - apply a small pour onto the stain, blotting frequently until the stain vanishes.

Then after the clean-up, think about calling Holiday Carpet Cleaning to deep clean the stain and into the padding. Our deep cleaning steam extraction method is more powerful than the rentals available or a store-bought carpet shampooer.
